## SUMMARY

As motivated and enthusiastic, I am eager to make a contribution to an organization in the field using the skills and knowledge acquired through my internship and project. In particular, I am interested in opportunities that allow me to apply my engineering skills to innovative technologies

---

## EDUCATION

### Bachelor in Technology in Computer Science and Engineering

Sep 2022 - Present

- Sandip University, Nashik CGPA:8.85

### Diploma in Computer Engineering

Aug 2019-Apr2022

- Government Polytechnic, Osmanabad Percentage: 77.77%

### Secondary School Certificate (Class 10)

- Ravindra High School, Bhoom Percentage:80.20%

Completed: May 2019

---

## SKILLS

- Technical Skills:** Python, Java, C++, C language, JavaScript, HTML, CSS, MySQL
- Tools:** Visual Studio Code, Android Studio, Eclipse, Command Line/Terminal
- Soft Skills:** Problem-Solving, Teamwork, Good Communication, Critical Thinking

---

## PROJECTS

### Attendance Management System using Android (Diploma Project)

- Developed an Attendance Management System as an Android application to automate attendance tracking. Built using Java and XML in Android Studio, with Firebase Real-time Database for secure data storage. The app includes features for user authentication, attendance marking, and viewing reports, offering a seamless and efficient experience for both students and faculty.

### IOT Based Anti-Theft Floor Mat (UG Project)

- Developed an IoT-based Anti-theft Floor Mat to detect unauthorized movement and enhance security. The system used Arduino and ESP8266/ESP32 modules to monitor pressure changes on the mat and send real-time alerts to a mobile device or security system. Integrated sensors trigger notifications upon detecting movement, providing an effective and immediate response to theft attempts.

---

## EXPERIENCE

Apr 2023--May 2023

### Python Developer intern: Code Clause

- Completed three tasks to strengthen Python skills: developed a Speed Typing Test and a Calculator using Python and Tkinter, and built a Random Password Generator using Python's random and string libraries. Gained hands-on experience in creating interactive Python applications.

---

## CERTIFICATIONS

- Datacom Software development virtual experience Internship
- Python Basic certification by Hackerrank
- Front end Development-HTML certification by Great Learning
