CISCO Networking Academy

May 2022 - June 2022

Cyber Security

Remotely

Projects

Ixigo Clone | *Tech Stack: React, JavaScript, HTML, CSS*

December 2023

- Developed a full-featured clone of the Ixigo travel booking platform, leveraging modern web technologies. The application provides users with the ability to search and book flights, hotels, trains, and buses, along with user registration, login, and checkout functionalities.
- **Flights:** Dynamic search, real-time data integration, detailed information pages.
- **Hotels:** Search filters, detailed pages with amenities, reviews, and gallery.
- **Trains:** Route search, live status, schedules, and fare information.
- **Buses:** Ticket booking, route search, seat selection, operator details.

Reliance Digital Clone | *Tech Stack: React, JavaScript, HTML, CSS*

November 2023

- Led the development of a comprehensive e-commerce platform mimicking the functionality and design of the Reliance Digital website. Employed HTML, CSS, JavaScript, and React for front-end development and integrated APIs for real-time product information.

Stock Market Dashboard | *Tech Stack: JavaScript, HTML, CSS*

September 2023

- Conceptualized, designed, and implemented a dynamic Stock Market Dashboard, leveraging HTML, CSS, and JavaScript, to provide users with real-time stock information through seamless API integration.

Testing On Windows Operating System designed on Cyber Security-Ethical Hacking

October 2021

- Spearheaded a comprehensive Cyber Security and Ethical Hacking project focused on testing the security resilience of Windows operating systems using Kali Linux as the primary testing platform.

Movie Deck | *Tech Stack: JavaScript, HTML, CSS*

September 2023

- Web-based movie browsing application using core web technologies with a user-friendly interface.

Technical Skills
